- a. Memorandum to SA/PD/DCI from Messrs. [REDACTED], Subject: 25X1A9a
Status of Project [REDACTED] -- Aerial Photography and Mapping in
[REDACTED] dated 7 July 1958
- b. Top Secret Supplement to Reference a. (TS#71157)

1. The information in the following paragraphs was extracted from
Reports #1 and #2, dated 19 June 1958 and 6 July 1958 respectively, from
[REDACTED] These
documents were obtained from the company [REDACTED]
Office, and are controlled "CONFIDENTIAL-SECRET".

25X1A5a1

25X1A6a

2. Report #1

We discussed means of cooperating with the Russian team
for exchange of control data and tying our work with
theirs. The Russians are proposing a tie along the road
which runs due [REDACTED] We, however,
still need the tie on the road to the north. I presume
this will be settled in Washington. I feel we should
insist on this northern tie. The Russians will bring in
horizontal and vertical control from the north.

25X6A

The style sheets will be forwarded as soon as arrangements
have been worked out with the Russians to insure that they
will use the same system as we. I understand they have
agreed to using the UTM grid.

Believe you and Olav agreed to the International Spheroid
and not the Everest as indicated on our style sheet.

. . . . I inquired whether any mosaics had been delivered
for the northern area in order that the quality might be
compared. However, no deliveries have yet been made.

3. Report #2

25X6A

Enclosed you will find the new amendment signed by the
[REDACTED]

25X6A

You will note no reference is made to location of vertical control as they claim the Russians have run considerable levels around [REDACTED] etc., areas. He feels the money could then be spent to run levels from [REDACTED] We will still be able to run APR and photo strips to the northern road for control ties.

25X6A

The Russian team have run into a snag and all negotiations have ceased until Dr. Yusuf's return. They apparently will not agree to certain scales, etc. So far they have quoted a price of \$200,000 for 100,000 square kms. including everything. (Funny, exactly \$5.18 per sq. mile.) Haven't been able to find out just what they propose to deliver for this amount.

Did you receive my cable about using the International Spheroid? Guess we are stuck with this as they maintain it had been very definitely decided that we would use the International and not the Everest Spheroid.

25X6A

4. Mr. Kendall of the Office of Chief of Engineers, Department of the Army, is [REDACTED] with a team of three Army Map Service technicians [REDACTED] to discuss with [REDACTED] and the [REDACTED] and Russians, many of the problems referred to above. Messrs. Kendall (OGE) and Wilkerson (AMS) were briefed by GSA personnel prior to their departure. (A copy of the Memorandum of Conversation, dated 10 July 1958, is enclosed.)

25X6A
25X1A5a1

5. The reference in Ringers' Report #2 to the quotation of a price for "100,000 square kilometers, including everything" is at variance with previous reports (see Reference b.) stating that the Russians had agreed to do topographic surveys of 43,000 square kilometers. It is possible that the Russians have already (or plan to) enlarge this area to forestall the possibility of the United States photographing or mapping any of the northern section of the country. It is also possible that the [REDACTED] are utilizing the competitive nature of the US-USSR relationship to insure complete and comprehensive coverage of their country.
